PetPulse - Whoop for your pet!

Pain Points

1. Pets Cannot Communicate Illness

Pets instinctively hide pain and illness, making it difficult for owners to know when something is wrong. As a result, health problems are often discovered only when symptoms become severe.

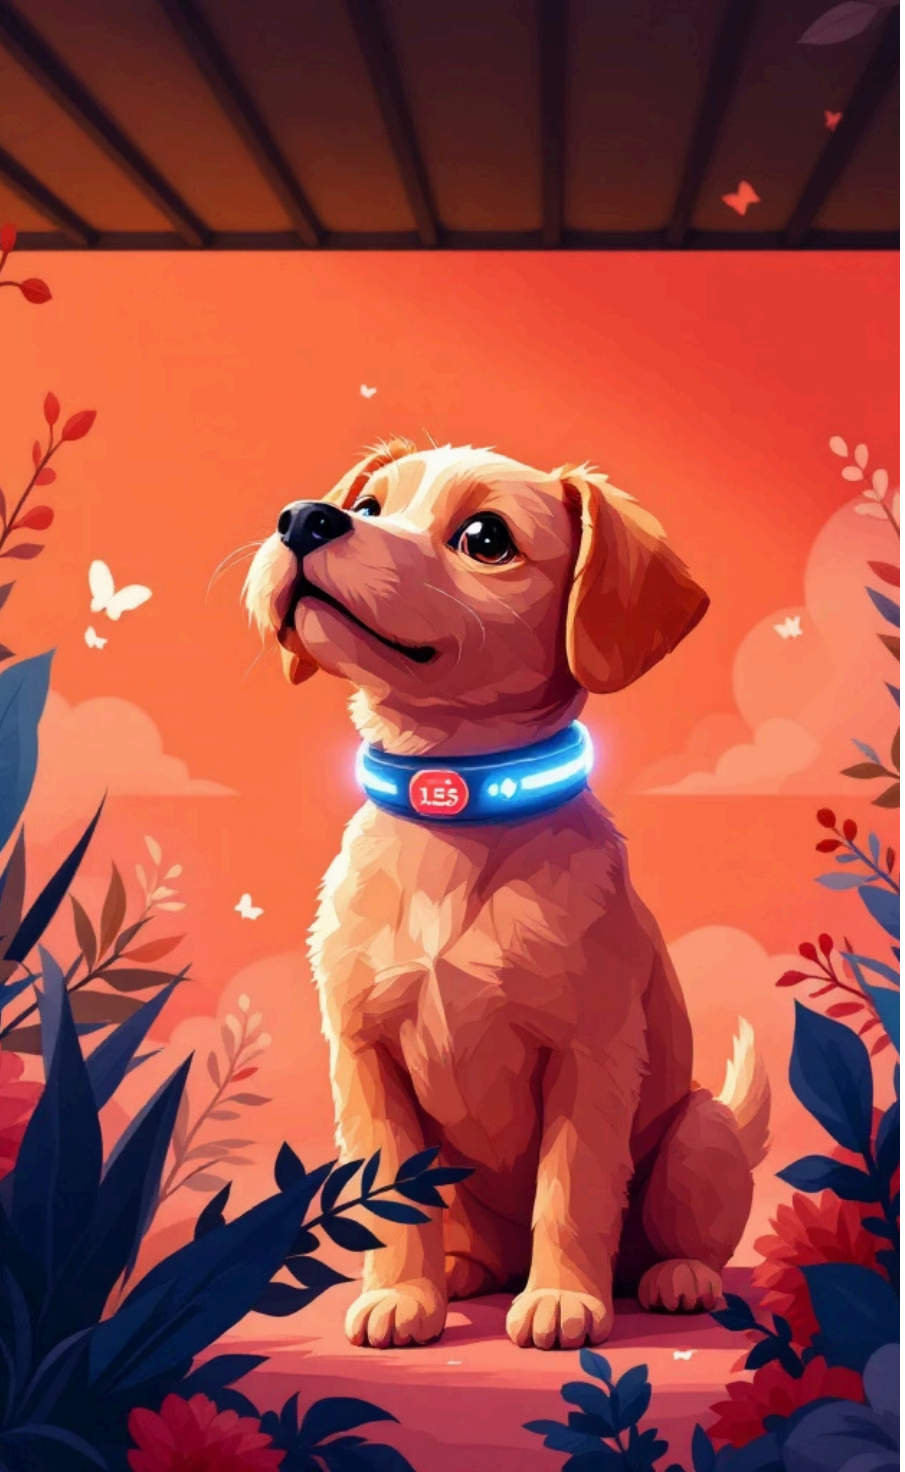

2. Pet Health Is Monitored Only During Vet Visits

Most pets see a veterinarian once or twice a year, leaving long periods with no visibility into their health or behavior. Subtle changes in activity, sleep, or stress often go completely unnoticed.

3. Late Detection Leads to Expensive and Serious Health Issues

Conditions like obesity, arthritis, infections, and heart problems often develop gradually but are diagnosed too late — while that could have been solved early on with only nutrition.

Made with GAMMA

THE SOLUTION

PetPulse — The WHOOP for Pets

A smart wearable collar powered by AI. PetPulse continuously monitors your pet's vitals and flags health risks before they become emergencies — across three critical conditions: **Congestive Heart Failure, Osteoarthritis, and Chronic Kidney Disease.**

📡 Real-Time Health Tracking

Heart rate, respiratory rate, sleep, stress, activity & more. Core focus on Cardiovascular Diseases, Chronic Pain, and Renal Diseases.

🤖 AI-Powered Insights

Personalised nutrition advice and early risk alerts via **PawsAI**.

Go-To-Market Strategy

🐾 Pet Shows — Primary Launch Channel

Acquire early users at large pet events such as **India International Pet Trade Fair** (15K visitors) and **PETEX India** (25K attendees).

Scale Channels

- Veterinary clinic partnerships for trusted recommendations
- Direct-to-consumer online sales
- Later expansion through pet retail and insurance partnerships

Acquisition Funnel

Expected Conversion

~10,000 event visitors → ~2,000 booth interactions → ~1,000 health assessments → **60 to 80 paying subscribers**

01

Free pet health check → live diagnostics (weight, breed risk, nutrition)

02

Personalised plan + discounted first-month subscription

03

Monthly health reports delivered to owner

Made with GAMMA

Business Model

Revenue Model

Hardware sale of pet health tracker band plus recurring subscription for health insights and analytics.

Pricing

Cost Drivers

- Hardware manufacturing and sensors
- App development and cloud infrastructure
- AI analytics and customer acquisition
